

Quality Policy

Compulink aims to be a leader in cable and harness manufacture in the data communications, and OEM high-reliability marketplace. Our policy is to meet or exceed customer directed quality requirements, applicable statutory or regulatory requirements while providing on time deliveries at a competitive price.

Product quality involves all employees at Compulink; and also, our suppliers. Each employee is responsible for their input to the procurement, manufacture, support, delivery or service provided. Each supplier needs to be likewise committed to this quality objective.

The business philosophy of Compulink focuses on commitment to continual improvement and customer satisfaction in all activities undertaken.
