

Compulink Counterfeit Material Policy

Compulink is committed to preventing counterfeit material from being integrated into our products. To achieve this we incorporate the following principles:

- 1) **Avoidance**-We only utilize material manufactured by the original component / material manufacturer or from their authorized distributors.
- 2) **Communication**-We inform our entire supply chain of this policy and hold them accountable for compliance.
- 3) **Detection**-We ensure that our company maintains and communicates appropriate processes and training in regards to counterfeit material prevention and detection.
- 4) **Mitigation**-We investigate all incidents of suspected counterfeit materials reported to Compulink. We ensure that suspected counterfeit material will be quarantined and will not be incorporated into Compulink products (until material status is confirmed to be 100% compliant).
- 5) **Disposition / Communication**- We ensure the isolation, quarantine, and removal of counterfeit material from the Compulink supply chain and make appropriate timely disclosures to the proper authorities and to our customers.
